Transcriber's Office
FLOOR DEBATE

April 25, 2001 LB 536

costs to get these sites cleaned up and build new stations and C-stores, and what not, on them. I obviously rise in opposition to the Bruning amendment. I think it's a very worthwhile program, it's in balance now, it's being run efficiently and they're making progress out there and lots of it. So, with that, if Senator Bromm wants to take another chance at a minute or two, it's up to him. I'd either yield my time to Senator Bromm, if you want it, there must be a couple minutes left or...how much time?

SPEAKER KRISTENSEN: Just a little under...

SENATOR BAKER: Maybe he has his light on. He has his light on. I'll just yield my time back to the Chair. Thank you.

SPEAKER KRISTENSEN: Senator Bromm, your light is next.

SENATOR BROMM: Thank you, Mr. President. I just wanted to conclude some statements about the LUST Fund. I...and Senator Baker covered a good deal of it, but I think we're on a very good course now with the program. We can't necessarily see light at the end of the tunnel but we can see progress. And I think that DEQ is using the money the way that it should be. Lots of projects where municipal wells or domestic wells are at risk are going forward and those where there is no discernible risk to the public are not...we're not wasting our money on them. And so this would be very, very bad timing to go in and, without study or...or any hearing and significant discussion about carving this money out would be very bad timing. So I don't know if this amendment is to...to make a point or what Senator Bruning's intentions are, but I simply rise in very strong opposition to the amendment. It would hurt the bill terribly. The bill...it would put many of us in a position of having to fight the bill. And if you're for the bill, you definitely wouldn't want this amendment. So, thank you, Mr. President.

SPEAKER KRISTENSEN: Senator Chambers.

SENATOR CHAMBERS: Mr. President, members of the Legislature, Senator Janssen is correct about being able to produce liquor
